Empowering Our Future: Unlocking Tomorrow's Potential

Empowering Our Future:

Unlocking Tomorrow's Potential

In 1982, the Unit Trust Corporation (UTC) embarked on a bold and ambitious mission — to redefine and reshape the financial landscape.

Driven by a vision of inclusivity, enabling growth and creating wealth, the UTC opened an avenue for every citizen to participate in unlocking the full potential of investing opportunities, regardless of their socio-economic background.

We have worked tirelessly to provide the tools to enable individuals to secure their financial futures. At the core of our efforts lies the simple belief that access to the financial markets should be open to all, democratising opportunities for wealth creation.

Today, we reaffirm our commitment to building a resilient financial community, not just in Trinidad and Tobago but across the region. In the past year, we have forged new strategic partnerships in Jamaica and the Eastern Caribbean, recognising that collaboration fosters mutual growth through leveraging each other's strengths and resources and amplifies the impact on people's financial futures.

The initiatives we champion are about building bridges that connect us and drive our nation's development. That is why we are passionate about people and empowerment. Our support for entrepreneurship is rooted in the recognition that individuals possess unique talents, ideas and aspirations, and when nurtured, they have the potential to power economic growth and social progress. As a catalyst for entrepreneurs, the UTC seeks to provide not only capital investments but also the mentorship and resources essential for fostering a dynamic ecosystem. In this way, we're not just shaping businesses — we're shaping futures and fuelling collective prosperity.

In a world of rapid change and uncertainty, success lies in the ability to adapt and innovate. It is not about short-term gains but rather sustainable growth over the long term. Our impetus has always been to unlock tomorrow's potential, supporting all our stakeholders and investors to make sound financial decisions and capitalise on investment opportunities.

It's our firm belief that your future is an expansive canvas, the brushstrokes filled with intent and possibilities.

CHIEF FINANCIAL OFFICER'S REPORT

Kerri Maharaj

Dear Fellow Unitholders,

The Calypso Macro Index Fund ('Calypso' or 'the Fund') completed its eighth year of operations in 2023, having officially launched in January 2016. Calypso is a closed-end mutual fund, which is scheduled to terminate on the redemption date of November 30, 2025.

In 2023, the Fund faced negative returns in its two portfolios: local equities and energy Exchange Traded Funds (ETFs). The All Trinidad and Tobago Stock Exchange Index (All T&T Index) registered negative returns of 9.80% and S&P 500 Energy Index declined by 4.80%. These negative returns led to the Fund recording a Total comprehensive loss of \$23 million for the vear ended 31 December 2023 compared to Total comprehensive income of \$104 million for the comparative year ended 31 December 2022. The lower reported result arose from unfavourable fair value movements in both investment portfolios, which declined from a gain of \$87 million in the prior year to a loss of \$40 million for the year ended 31 December 2023.

The lower performance resulted in the Fund recording a net asset value of \$29.44 per unit as at 31 December 2023 compared to \$31.39 per unit as at 31 December 2022, an overall decline of \$1.95 per unit.

Despite the lower result, we are pleased to report that distributions increased by 5% from \$0.76 per unit for the year ended 31 December 2022 to \$0.80 per unit for the year ended 31 December 2023. The higher payout was mainly due to an increase in cash returns generated from the portfolio's equity holdings.

The Fund's closing traded price on the Trinidad and Tobago Stock Exchange improved from \$21.15 at the end of 2022 to \$23.50 at the end of 2023.

The Future

The Fund's portfolio continues to comprise high-quality local and international investments, and despite stock market volatility, investors are encouraged to maintain a long-term outlook for their investment decisions even as we draw closer to the Redemption Date in 2025.

Kerri Maharaj Chief Financial Officer 26 April 2024

Crystal Rodriguez-Greaves

Dear Fellow Shareholders,

Against the backdrop of a decline in energy prices and despite another year of decline on the local equity market, the Calypso Macro Index Fund performed creditably well and delivered strong stock market returns and increased distributions in 2023.

ECONOMIC AND CAPITAL MARKET REVIEW

Local

Positive Growth, Falling Inflation

According to the Central Bank of Trinidad and Tobago (CBTT), domestic economic activity expanded by 3.0% year-on-year (y-o-y) in the first quarter of 2023 while preliminary indicators, monitored by the Bank, also suggest continued economic recovery during the second and third guarters of 2023. This recovery is being led by the non-energy sector. The transition from historically relying on the energy sector to a non-energy sector-led recovery signifies a pivotal shift in the economic landscape. Regarding 2023 in its entirety, the International Monetary Fund (IMF) estimates the local economy grew by 2.1% up from the 1.5% recorded in 2022. With respect to price levels, headline inflation fell drastically in 2023, declining from 8.7% at the end of December 2022 to 0.7% at the end of December 2023. The deceleration was primarily attributed to a fall in food prices. Official reserves, though slightly reduced from the previous year, stood at a healthy US\$6.3B or about 7.8 months of import cover as at the end of 2023. This compares to official reserves of US\$6.8B or 8.4 months of import cover at the end of 2022.

Debt Sustainability

In the presentation of the 2024 National Budget, the Minister of Finance announced that the total budgeted revenue is expected to be \$54.0B in the current fiscal year while total budgeted expenditure is expected to

be \$59.2B, resulting in a projected fiscal deficit of \$5.2B or 2.7% of GDP. This estimate is predicated on energy price assumptions of an oil price of US\$85.00 per barrel and a natural gas price of \$5.00 per MMBtu. In July 2023, S&P Global Ratings reaffirmed Trinidad and Tobago's "BBB-" credit rating while also maintaining its "Stable" outlook. The agency stated that its rating reflects the country's favorable external profile and stable democracy and was based on its view that the economy will continue to be supported by the hydrocarbon sector. S&P also noted that stronger economic performance and favorable long-term gross domestic product (GDP) growth prospects that lead to a sustained decline in government debt and an easing of external pressures could result in an upgrade in the country's credit rating over the next two vears.

Local Equity Contraction Persists

In 2023, the local stock market faced a challenging landscape, with all three major local indices experiencing another year of declines. The TT Composite Index, All T&T Index and Cross-Listed Index decreased by 8.9%, 9.8% and 5.6%, respectively. The returns on the TT Composite and Cross-Listed indices, though negative, represented improvements over the returns posted in 2022 of -11% and -29.9%. Performance of the All T&T Index, however, deteriorated in 2023 compared to 2022 when it generated a return of -3.7%. The worst-performing stocks were the West Indian Tobacco Company Limited (WCO) with a -57.6% return, Trinidad and Tobago NGL Limited (NGL) returning -52.6% and Guardian Holdings Limited (GHL) experiencing a -29.9% decline. Despite the overall negative trend, there were some stocks showing gains. The top three performers in 2023 were Endeavour Holdings Limited (EHL) with an impressive return of 49.7%, Prestige Holdings Limited (PHL) returning 48.1%, and Agostini's Limited (AGL) with a solid return of 37.0%.

Global

The Global Economic Landscape: Post-Covid vs. Pre-Covid

In 2023, the global economy's growth rate continued to decelerate from the 2021 post-Covid high. The IMF reported that global growth in 2023 was 3.1%. This is in comparison to growth rates of 5.9% and 3.4% in 2021 and 2022, respectively. However, while growth over the past two years has slowed, it is consistent with global growth rates that were observed in the period prior to the Covid-19 pandemic.

Growth in 2023 was driven by expansion in the emerging economies. The IMF reported that the growth rate for emerging economies was 4.1%, below 2021's post-Covid high of 6.5%, but an improvement over 2022's emerging market growth rate of 3.9%. Growth in the emerging economies in 2023 outpaced the growth rate of the last pre-Covid year, 2019, by 0.4%. Growth in advanced economies in 2023 was 1.6%, a lackluster performance compared to the emerging economies but consistent with the 2019 advanced economy growth rate of 1.7%.

While global growth has trended downward in 2022 and 2023 compared to 2021's rapid post-Covid expansion, the global and advanced economies' growth rates are reflective of pre-Covid patterns which have displayed a slightly slowing trend. Meanwhile, emerging market economies have shown a marginal increase over pre-Covid years.

U.S. Disinflation. Eased Recession Fears

2023 began with persistent fears of a recession in the United States (U.S.) that would be triggered by attempts by the U.S. Federal Reserve Bank (the Fed) to reign in persistent inflation that lingered from the initial post-Covid economic expansion. According to the U.S. Bureau of Labor Statistics, inflation measured 6.4% in January 2023 and the year started with the Fed's Federal Funds interest rate, the rate at which banks lend each other money, at 4.25% - 4.50%. In 2023, the Fed raised the Fed funds rate four times to 5.25% -5.50% in a continuation of its fight against inflation after seven previous interest rate hikes in 2022. Attempts by the Fed to contain inflation fuelled fears of a potential recession. However, as the year progressed, these fears subsided as the U.S. economy recorded estimated growth of 2.5% in 2023 according to the IMF. Financial and job markets also remained resilient while inflation eased, falling a total of three percentage points to end the year at 3.4%. As a result, market sentiment shifted away from recession fears to optimism of a soft landing, a situation where the Fed successfully reigns in inflation without causing a recession.

The AI-Driven Tech Boom

2023 saw a reversal of fortunes in international equity markets compared to 2022. According to Bloomberg, the MSCI World index registered a 21.8% return in

2023 compared to a return of -19.5% in 2022. In the U.S., all three major US indices posted impressive double-digit positive returns. The S&P 500 and Dow Jones Industrial Average recorded annual returns of 24.2% and 13.7% respectively, while the technology-focused NASDAQ surged with a positive return of 43.4%. Within the S&P 500 sectors, information technology led with an outstanding 56.4% return. Markets were buoyed by excitement surrounding progress in artificial intelligence (AI) and its promises to revolutionise computing and other industries.

The Deceleration of Global Growth Weighed on Global Energy Prices

In 2023, energy markets faced a challenging year. Softening global oil demand led by China as well as increased supply coming out from the U.S., Guyana, Brazil and Iran offset the effects of production cuts by OPEC+ as well as geopolitical tensions in Europe and the Middle East. As a result, the average prices of West Texas Intermediate and Brent crude oil declined by 18.26% and 18.36% respectively in 2023.

In the first half of 2023, crude oil prices fluctuated due to several factors, including the European Union's import ban on Russia's crude oil and products, tight monetary policy by global central banks to counter inflation as well as recession concerns. In June. Saudi Arabia announced an additional voluntary oil production cut of 1.0 million barrels per day for July in addition to the OPEC+ cuts. Following the start of the Israel-Hamas conflict, crude oil prices increased in early October. As fears of a wider conflict and supply disruptions eased, concerns around crude oil demand became the focal point, driving crude oil prices down. By mid-December, oil prices rose again as an escalation in the Israel-Hamas conflict occurred with multiple attacks on shipping vessels in the Red Sea.

FUND PERFORMANCE REVIEW

As at December 31, 2023, the Net Asset Value (NAV) of the Calypso Macro Index Fund stood at \$29.44, which represents a 6.1% decrease when compared to 2022's NAV. Notably, this occurred against the backdrop of a 9.8% decline in the All T&T Index and an average contraction of 7.8% in the selected energy ETFs over the same period. However, since its inception in January 2016, the fund has generated a 17.9% return with respect to its NAV. In terms of stock market performance, 2023 marked a strong year for the fund as its share price rose from \$21.15 at the end of 2022 to \$23.50 at the end of 2023, representing a 11.1% price return.

In 2023, the Fund provided investors with an estimated net return (NPR) of -6.1% based on the NAV price (inclusive of distributions paid and net of management charge and other Fund expenses). With respect to distributions, the Fund paid \$16.2M to Unitholders in 2023, representing a 5.3% increase over the distribution paid in 2022. Since inception, the Fund has paid thirty-two (32) quarterly distributions to Unitholders totalling \$101.2M. Funds Under Management also increased by approximately 19.0% compared to the initial \$500M when the Fund was started in 2016. In terms of asset allocation, as at December 31, 2023, the Fund held 47.6% in international equities, 49.4% in domestic equities and 2.9% in cash and cash equivalents.

How does UTC see the economic and capital market environment in 2024?

Local

After recording an estimated growth rate of 2.1% in 2023, the economy of Trinidad and Tobago is forecasted to grow by 2.4% in 2024, according to the IMF. This view is also shared by the CBTT, with the Bank projecting growth in the short term, driven by continued strength in the non-energy sector due to robust business activity and consumer demand. Over the medium term, the IMF expects the energy sector to receive a boost from several planned natural gas projects which, in turn, should support economic activity in the non-energy sector. Headline inflation is projected to stay relatively low in 2024, especially as imported inflation is anticipated to stay modest barring any new external shocks. However, the CBTT warns that potential factors such as weather conditions, higher utility rates, increased cement prices and property taxes could lead to an increase in domestic inflation.

Trinidad and Tobago's trade surplus in goods is expected to narrow in the coming years as hydrocarbon production reaches its peak, despite increased investments in the sector. Nevertheless, export values are projected to stay elevated in 2024, driven by the global economic recovery, which

is pushing energy prices higher. Import demand is likely to be tempered by weak capital goods demand and domestic foreign exchange shortages.

Looking at fiscal dynamics, the IMF estimates the fiscal deficit will widen to 2.7% of GDP in 2024. This reflects lower energy revenues due to declining prices and production, increased capital spending and a higher wage bill. However, Trinidad and Tobago's fiscal deficit is anticipated to be well-managed over the mediumto-long term. Revenue gains, particularly from hydrocarbons, will play a pivotal role, reflecting measures implemented in recent years to broaden the tax base. In the medium-to-long term, expenditure growth is expected to be constrained as the government addresses its growing debt load.

Global

The global economy is forecasted to grow by 3.1% in 2024, the same as 2023, before marginally increasing to 3.2% in 2025. Advanced economies are expected to see growth decline slightly in 2024 compared to 2023, moving from 1.6% to 1.5%, before rising in 2025 to 1.8%. A recovery in the Eurozone area from anaemic growth of 0.5% in 2023 to 0.9% in 2024 is anticipated along with a moderation of growth in the United States from 2.5% to 2.1%. Emerging markets and developing economies are expected to experience stable growth in 2024 and 2025 with regional differences.

Meanwhile, global headline inflation is expected to fall from an estimated 6.8% in 2023 to 5.8% in 2024 and then further to 4.4% in 2025. Advanced economies are expected to see faster disinflation, with inflation falling by two percentage points in 2024 to 2.6%. Inflation in emerging markets and developing economies is projected to decline by just 0.3% to 8.1%. Overall, about 80% of the world's economies are expected to see lower annual average headline and

core inflation in 2024 against the backdrop of unwinding supply-side issues and restrictive monetary policy.

With steady growth and a continuing downward trend in inflation expected, the likelihood of a sharp economic contraction following a period of rapid growth commonly known as a hard landing has receded and the risks to global growth are broadly balanced according to the IMF. Key risks to this outlook include new commodity price spikes from geopolitical shocks, particularly coming out from the Middle East. Supply disruptions or more persistent underlying inflation could prolong tight monetary conditions. Additionally, continued challenges in the real estate sector in China as well as a disruptive turn to tax hikes and spending cuts could also cause growth disappointments in the global economy in 2024.

Energy

According to the International Energy Agency (IEA), oil supply is expected to grow to a record high of about 103.8 million barrels per day (bpd) in 2024, almost entirely driven by production coming out of the United States, Brazil and Guyana. In order to support the market, amid concerns over global growth and rising output outside the group, OPEC+ members

led by Saudi Arabia and Russia, at its latest meeting in March, decided to extend voluntary oil output cuts of 2.2 million barrels per day into the second quarter of 2024. Against that backdrop, oil prices (West Texas Intermediate) are expected to rise to US\$82.15 per barrel in 2024 from US\$77.58 at the end of 2023 according to the Energy Information Agency (EIA). Conversely, Henry Hub gas prices are expected to decline from US\$2.50 per MMBtu in 2023 to US\$2.30 in 2024. This as milder weather in the U.S. is expected to curb residential and commercial sector consumption of natural gas, resulting in a large surplus of storage.

Closing

Amid the array of challenges encountered in 2023, the Trinidad and Tobago Unit upheld Trust Corporation has unwavering commitment to you, our valued shareholders, as diligent and capable stewards of your financial future.

Notwithstanding the uncertainty that exists in the current economic landscape, we remain vigilant in seeking out appropriate investment opportunities while also and effectively prudently managing all attendant risks. We will continue to work assiduously in our quest to secure sustainable, long-term investment returns on your behalf.

Thank you to our valued shareholders for the continued support shown in 2023. We look forward to serving you in 2024.

We remain your Partners For Life.

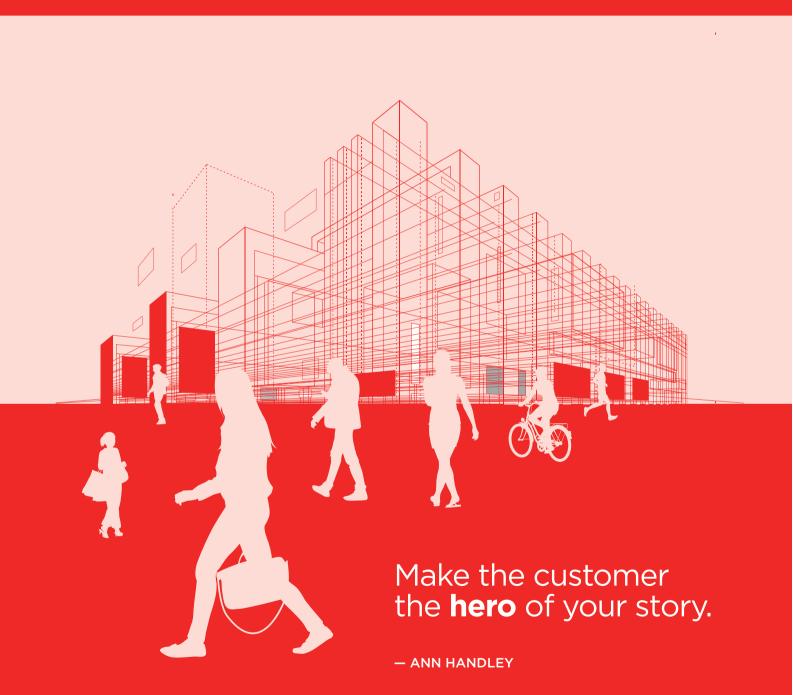

Crystal Rodriguez-Greaves Chief Investment Officer 26 April 2024

TO: THE BOARD OF DIRECTORS
TRINIDAD AND TOBAGO UNIT TRUST CORPORATION

REPORT OF THE AUDITOR GENERAL OF THE REPUBLIC OF TRINIDAD AND TOBAGO ON THE FINANCIAL STATEMENTS OF THE TRINIDAD AND TOBAGO UNIT TRUST CORPORATION – CALYPSO MACRO INDEX FUND FOR THE YEAR ENDED 31 DECEMBER 2023

OPINION

The financial statements of the Trinidad and Tobago Unit Trust Corporation – Calypso Macro Index Fund (the Fund) for the year ended 31 December 2023 have been audited. The statements as set out on pages 1 to 27 comprise a Statement of Financial Position as at 31 December 2023 and the Statement of Comprehensive Income, a Statement of Changes in Equity and a Statement of Cash Flows for the year then ended, and Notes to the Financial Statements numbered 1 to 15, including a summary of material accounting policies.

2. In my opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Trinidad and Tobago Unit Trust Corporation – Calypso Macro Index Fund as at 31 December 2023 and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

BASIS FOR OPINION

3. The audit was conducted in accordance with the principles and concepts of International Standards of Supreme Audit Institutions (ISSAIs). The Auditor General's responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of this report. The Auditor General is independent of the Fund in accordance with the ethical requirements that are relevant to the audit of the financial statements and other ethical responsibilities have been fulfilled in accordance with these requirements. It is my view that the audit evidence obtained is sufficient and appropriate to provide a basis for the above audit opinion.

RESPONSIBILITIES OF MANAGEMENT AND THOSE CHARGED WITH GOVERNANCE FOR THE FINANCIAL STATEMENTS

4. Management of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

- 5. In preparing the financial statements, management is responsible for assessing the ability of the Fund to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.
- 6. Those charged with governance are responsible for overseeing the financial reporting process of the Fund.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS

- 7. The Auditor General's responsibility is to express an opinion on these financial statements based on the audit and to report thereon in accordance with section 30 (4) of the Unit Trust Corporation of Trinidad and Tobago Act, Chapter 83:03. The audit was carried out in accordance with section 30 (1) of the said Act.
- 8. The Auditor General's objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes his opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the principles and concepts of ISSAIs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.
- 9. As part of an audit in accordance with the principles and concepts of ISSAIs, the Auditor General exercises professional judgment and maintains professional skepticism throughout the audit. The Auditor General also:
 - Identifies and assesses the risks of material misstatement of the financial statements, whether due to fraud or error, designs and performs audit procedures responsive to those risks, and obtains audit evidence that is sufficient and appropriate to provide a basis for an opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
 - Obtains an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control of the Fund.
 - Evaluates the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
 - Concludes on the appropriateness of management's use of the going concern basis of
 accounting and, based on the audit evidence obtained, whether a material uncertainty
 exists related to events or conditions that may cast significant doubt on the ability of the
 Fund to continue as a going concern. If the Auditor General concludes that a material
 uncertainty exists, the Auditor General is required to draw attention in his audit report to
 the related disclosures in the financial statements or, if such disclosures are inadequate, to

modify his opinion. The Auditor General's conclusions are based on the audit evidence obtained up to the date of his audit report. However, future events or conditions may cause the Fund to cease to continue as a going concern.

- Evaluates the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- 10. The Auditor General communicates with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that were identified during the audit.

Notes to the Financial Statements

For the year ended 31 December 2023 (Expressed in thousands of Trinidad and Tobago dollars)

1. General Information

The Calypso Macro Index Fund (the Fund) is a closed-end mutual fund denominated in Trinidad and Tobago dollars, that was launched on 8 January 2016, and is scheduled to terminate on the redemption date of 30 November 2025 or such later date as may be prescribed by the Regulations of the Fund.

The Fund is governed by Regulations made for the Fund by the Board of Directors of the Trinidad and Tobago Unit Trust Corporation (the Corporation) with the approval of the Central Bank of Trinidad and Tobago under Section 14(1) of the Unit Trust Corporation Act (the Act). The termination or redemption date may be extended in accordance with the provisions of Clause 27.1 of the Regulations. The Custodian of the Fund is the Trinidad and Tobago Central Depository (TTCD).

The Corporation is the Sponsor, Manager, Trustee and Investment Advisor of the Fund. Responsibility for managing the business affairs of the Fund is vested in the Board of Directors of the Corporation which approves all the Fund's significant agreements. The Corporation's registered office is located at UTC Financial Centre, 82 Independence Square, Port of Spain.

Participation by investors in the Fund is by units, which represent an undivided share in the Deposited Property. The Deposited Property means all the assets and investments of the Fund for the time being held or deemed to be held by the Trustee. No unitholder is entitled to any interest or share in any particular part of the Depository Property until such time as the Fund is terminated. The units of the Fund are traded on the Trinidad and Tobago Stock Exchange (TTSE).

Subscriptions

Subscription to the Fund closed on 4 December 2015 at the end of the initial offer period. During the initial offer period 20,000,000 units were offered at a price of TT\$25.00 per unit. On the transfer date the Trustee issued:

- i. 20,000,000 units to successful applicants, and
- ii. 200,000 units to the Fund Sponsor.

Redemptions

No unitholder is entitled to redeem units prior to the Redemption Date of 30 November 2025 or such later Redemption Date as may be prescribed under the Regulations of the Fund.

Notes to the Financial Statements

For the year ended 31 December 2023 (Expressed in thousands of Trinidad and Tobago dollars) (Continued)

1. General Information (continued)

Investment Objective

The objective of the Fund is to hold the Deposited Property of the Fund for a period of ten years. The Fund seeks to provide investors with exposure to the Trinidad and Tobago Stock Exchange all T&T Index, as well as exposure to global energy companies through investment in the Global Energy Index. Each unit provides instant diversification to the investor.

Trading of Units

Unitholders may sell, transfer or otherwise dispose of their units by trading on the TTSE in accordance with its rules for effecting such transactions. The Registrar, transfer agent and income paying agent of the Fund is the Trinidad and Tobago Central Depository Limited. The Registrar maintains the records with respect to each unitholder of the Fund.

Termination of the Fund

The Fund will continue until the Redemption Date and upon full and final disposition of the Deposited Property. The proceeds from the disposition of the Deposited Property, together with the Fund's income, will be distributed to the unitholders pro rata minus any monies required to discharge unpaid liabilities properly incurred by the Trustee.

2. Material Accounting Policies

The material accounting policies applied in the preparation of these financial statements (the "Financial Statements") are set out below. These policies have been consistently applied to all years presented.

a) Basis of Preparation

- i. The Financial Statements have been prepared in accordance with International Financial Reporting Standards (IFRS). IFRS Accounting Standards comprise the following authoritative literature:
 - IFRS Accounting Standards
 - International Accounting Standards (IASs)
 - Interpretations developed by the IFRS Interpretations Committee (IFRIC Interpretations) or its predecessor body, the Standing Interpretations Committee (SIC Interpretations)
- ii. The Financial Statements were prepared under the historical cost convention as modified by financial assets measured at fair value through profit or loss (FVPL) and equity instruments measured at fair value through other comprehensive income (FVOCI). The methods used to fair value the Fund's financial assets are provided at Note 11.

Notes to the Financial Statements

For the year ended 31 December 2023 (Expressed in thousands of Trinidad and Tobago dollars) (Continued)

2. Material Accounting Policies (continued)

a) Basis of Preparation (continued)

- iii. The Financial Statements are presented in Trinidad and Tobago dollars, which is the functional currency of the Fund.
- iv. The preparation of the Financial Statements in accordance with IFRS requires management to make judgements, estimates and assumptions. Management reviews these judgements, estimates and underlying assumptions on a regular basis.
- v. The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities are those used in estimating the fair value of financial assets categorised as Level 3.

Management has also exercised significant judgement in determining the business model of the investment portfolios.

b) Changes in Accounting Policies and Disclosures

Standards and amendments to existing standards effective 1 January 2023

There are no standards, amendments to standards or interpretations that are effective for annual periods beginning on 1 January 2023 that have a material effect on the financial statements of the Fund.

New standards, amendments and interpretations effective after 1 January 2023 and have not been early adopted.

A number of new standards, amendments to standards and interpretations that are issued but not yet effective, up to the date of issuance of the Fund's financial statements, have not been early adopted in preparing these financial statements. None of these are expected to have a material effect on the financial statements of the Fund.

c) Deposits with Banks

Deposits with banks comprise highly liquid financial assets that are subject to an insignificant risk of changes in their fair value.

Notes to the Financial Statements

For the year ended 31 December 2023 (Expressed in thousands of Trinidad and Tobago dollars) (Continued)

2. Material Accounting Policies (continued)

d) Due from/to Brokers

In accordance with the Fund's policy of trade-date accounting for regular-way sale and purchase transactions, sales/purchase transactions awaiting settlement represent amounts receivable/payable for securities sold/purchased but not yet settled as at the reporting date.

e) Financial Instruments

Financial Assets

i) Initial recognition and subsequent measurement

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

The Fund classifies its financial assets based on the business model of the portfolio within which the financial asset is managed and the contractual cash flow characteristics of the financial asset.

In assessing the objective of a portfolio's business model, the Fund considers:

- i. The way in which the assets within the portfolio are managed and information provided to management;
- ii. The stated policies and objectives of the portfolio;
- iii. The operation of the portfolio's stated policies in practice;
- iv. The method of evaluating the performance of the portfolio; and
- v. The risks that affect the performance of the portfolio and how those risks are managed.

The Fund's investment securities are held in portfolios which are managed and evaluated on a fair value basis. The receipt of contractual cash flows and the purchase and sale of the financial assets in the portfolio, are incidental to the objectives of the portfolios.

Notes to the Financial Statements

For the year ended 31 December 2023 (Expressed in thousands of Trinidad and Tobago dollars) (Continued)

2. Material Accounting Policies (continued)

e) Financial Instruments (continued)

Financial Assets (continued)

i) Initial recognition and subsequent measurement (continued)

Financial assets at fair value through profit or loss (FVPL)

Investments in equity instruments are classified as FVPL, unless the Fund designates an investment that is not held for trading as fair value through other comprehensive income (FVOCI) on initial recognition.

Financial assets at FVPL are those that are mandatorily required to be measured at fair value under IFRS 9. Management only designates an instrument at FVPL upon initial recognition when one of the following criteria are met. Such designation is determined on an instrument-by-instrument basis:

- i. The designation eliminates, or significantly reduces, the inconsistent treatment that would otherwise arise from measuring the assets or liabilities or recognising gains or losses on them on a different basis.
- ii. The liabilities are part of a group of financial liabilities, which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk management or investment strategy.

Financial assets at FVPL are recorded in the Statement of Financial Position at fair value at the end of each reporting period. Changes in fair value are recorded in the Statement of Comprehensive Income.

The net gain or loss recognised in the Statement of Comprehensive Income is determined in the manner described in Note 2 (f).

Dividend income from equity instruments measured at FVPL is recorded in the Statement of Comprehensive Income as other operating income when:

Notes to the Financial Statements

For the year ended 31 December 2023 (Expressed in thousands of Trinidad and Tobago dollars) (Continued)

2. Material Accounting Policies (continued)

e) Financial Instruments (continued)

Financial Assets (continued)

i) Initial recognition and subsequent measurement (continued)

Financial assets at fair value through profit or loss (FVPL) (continued)

- i. the right to receive a dividend payment is established;
- ii. it is probable that the economic benefits associated with the dividend will flow to the Fund;
- iii. the amount of the dividend can be reliably measured.

The Fund does not reclassify its financial assets subsequent to their initial recognition, apart from the exceptional circumstances in which the Fund acquires, disposes of, or terminates a business line. Financial liabilities are never reclassified.

Financial assets at fair value through other comprehensive income (FVOCI)

Upon initial recognition, the Fund occasionally elects to classify irrevocably some of its equity investments as equity instruments at FVOCI when they meet the definition of equity under IAS 32 Financial Instruments: Presentation and are not held for trading. Such classification is determined on an instrument-by-instrument basis.

Gains and losses on these equity instruments are never recycled to profit. Dividends are recognised in profit or loss as other operating income when the right of the payment has been established, except when the Fund benefits from such proceeds as a recovery of part of the cost of the instrument, in which case, such gains are recorded in OCI.

Equity instruments at FVOCI are not subject to an impairment assessment. The Fund's equity instruments are not traded.

Foreign exchange gains and losses

The fair value of financial assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of each reporting period. The foreign exchange component forms part of its fair value gain or loss.

Therefore, for financial assets that are classified as FVPL, the foreign exchange component is recognised in the Statement of Comprehensive Income.

Notes to the Financial Statements

For the year ended 31 December 2023 (Expressed in thousands of Trinidad and Tobago dollars) (Continued)

2. Material Accounting Policies (continued)

e) Financial Instruments (continued)

Financial Assets (continued)

ii) Derecognition of financial assets

The Fund derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Fund neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Fund recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Fund retains substantially all the risks and rewards of ownership of a transferred financial asset, the Fund continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

Financial Liabilities

i) Initial recognition and subsequent measurement

The Fund recognises a financial liability when it becomes party to the contractual obligations of the financial instrument. The Fund determines the classification of its financial liabilities at initial recognition.

ii) Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or has expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognising of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in the Statement of Comprehensive Income.

Notes to the Financial Statements

For the year ended 31 December 2023 (Expressed in thousands of Trinidad and Tobago dollars) (Continued)

2. Material Accounting Policies (continued)

f) Fair Value Measurement

Valuation framework

The Fund has established a control framework for the measurement of fair values. The framework includes a valuation team that is independent of front office management. The valuation team reports to a Valuation Committee comprising the Chief Financial Officer, Chief Risk Officer and other senior officers. On a monthly basis, the Valuation Committee reviews the prices for non-traded bonds prior to incorporation into the Fund, while a meeting is held quarterly, or more frequently as required, to discuss and approve the fair value of assets in the funds. The Valuation Committee reports to the Audit Committee in relation to significant changes to the valuation methodology.

Valuation techniques

The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received to sell the asset or paid to transfer the liability in an orderly transaction between market participants at the measurement date.

Valuation techniques include net present value and discounted cash flow models, comparison with similar instruments for which observable market prices exist and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premiums used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity indices, EBITDA multiples and revenue multiples and expected price volatilities and correlations.

The Fund uses valuation models that use observable market data for determining the fair value of its financial instruments. Observable prices or model inputs are usually available in the market for listed debt and equity securities. The availability of observable market prices and model inputs reduces the need for management judgement and estimation and reduces the uncertainty associated with the determination of fair values. The availability of observable market prices and inputs varies depending on the debt, equity and exchange-traded funds and is prone to changes based on specific events and general conditions in the financial markets.

Notes to the Financial Statements

For the year ended 31 December 2023 (Expressed in thousands of Trinidad and Tobago dollars) (Continued)

2. Material Accounting Policies (continued)

f) Fair Value Measurement (continued)

Valuation techniques (continued)

For more complex instruments, the Fund uses proprietary valuation models, which are usually developed from recognised valuation models. Some or all of the significant inputs into these models may not be observable in the market and are derived from market prices or rates or are estimated based on assumptions. Valuation models that employ significant unobservable inputs require a higher degree of management judgement and estimation in the determination of fair value. Management judgement and estimation are usually required for the selection of the appropriate valuation model to be used, determination of expected future cash flows on the financial instrument being valued, determination of the probability of counterparty default and prepayments and selection of appropriate discount rates.

Fair value estimates obtained from models are adjusted for any other factors, such as liquidity risk or model uncertainties, to the extent that the Fund believes that a third party market participant would take them into account in pricing a transaction. Fair values reflect the credit risk of the instrument and include adjustments to take account of the credit risk of the Fund and the counterparty where appropriate.

The fair values of financial assets and financial liabilities that are traded in active markets are based on prices obtained directly from an exchange on which the instruments are traded.

An active market is a market in which transactions take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

For financial instruments that trade infrequently and have little price transparency, fair value is less objective and requires varying degrees of judgement depending on liquidity, uncertainty of market factors, pricing assumptions and other risks affecting the specific instrument. For all other financial instruments, the Fund determines fair values using other valuation techniques.

Notes to the Financial Statements

For the year ended 31 December 2023 (Expressed in thousands of Trinidad and Tobago dollars) (Continued)

2. Material Accounting Policies (continued)

f) Fair Value Measurement (continued)

Fair value hierarchy

The Fund measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements.

- Level 1 Inputs that are quoted market prices (unadjusted) in active markets for identical instruments.
- Level 2 Inputs other than quoted prices included within Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are not considered active; or other valuation techniques in which all significant inputs are directly or indirectly observable from market data.
- Level 3 Inputs that are unobservable. This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments but for which significant unobservable adjustments or assumptions such as trading comparables, transaction comparables are required to reflect differences between the instruments.

The Fund considers observable data to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary and provided by independent sources that are actively involved in the relevant market.

Valuation techniques for specific instruments

Equities and Exchange traded Funds (ETFs) in active markets

The fair value of equities traded in active markets is based on unadjusted quoted prices at the close of trading on the reporting date and categorised as Level 1.

Categorisation of short-term investments

The Fund's short-term investments are assumed to be encashable/tradeable at their carrying value and are categorised as Level 1.

Receivables, payables and short-term liabilities

The carrying value of receivables and payables, which are of a short-term nature, are assumed to approximate their fair values.

Notes to the Financial Statements

For the year ended 31 December 2023 (Expressed in thousands of Trinidad and Tobago dollars) (Continued)

2. Material Accounting Policies (continued)

g) Revenue Recognition

Interest income is recognised in the Statement of Comprehensive Income using the effective interest rate method. The EIR is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset or liability or, when appropriate, a shorter period, to the gross carrying amount of the financial asset. Realised and unrealised investment gains and losses are recognised as income in the Statement of Comprehensive Income.

h) Taxation

The Fund is exempt from corporation tax. Withholding tax is payable on interest earned in foreign jurisdictions based on the jurisdiction's tax laws and double taxation treaties where applicable.

Taxes are recognised as an expense in the Statement of Comprehensive Income in the period in which they occur.

i) Foreign Currency Translation

The Fund's functional and presentation currency is Trinidad and Tobago dollars (TT\$). Transactions in foreign currencies are initially recorded in the functional currency at the midrate of exchange, quoted by the Central Bank of Trinidad and Tobago, ruling at the date prior to the transaction. Foreign exchange gains and losses resulting from the settlement of such transactions, and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies, are recognised in the Statement of Comprehensive Income.

3. Cash at Bank

Cash at Bank is analysed below:

	2023	2022
Cash at brokers	3,130	2,395
Cash at bank	15,601	11,581
Total	18,731	13,976

Cash at bank represents the balances of the accounts held in the various financial institutions as at 31 December.

Notes to the Financial Statements

For the year ended 31 December 2023 (Expressed in thousands of Trinidad and Tobago dollars) (Continued)

4.	Other	Rece	iva	hlec

	2023	2022
Dividend receivable	1,161	1,343
Total	1,161	1,343

5. Investment Securities

Summaries of the Investment Securities held by the Fund are provided by year, investment type and classification below.

	2023	2022
Investment securities carried at fair value		
Exchange traded funds (ETFs)	262,034	272,273
Quoted equities	315,499	346,941
Total	577,533	619,214
Investment securities summarised by classification		
- At fair value through profit or loss	262,034	272,273
- Equity instruments at fair value through		
other comprehensive income	315,499	346,941
	577,533	619,214
Other Payables		
	2023	2022
Amounts due to the Corporation (see Note 9)	253	269
Distribution payable	2,304	63
Total	2,557	332

7. Distributions to Unitholders

6.

Distributions to unitholders for the year ended 31 December 2023 amounted to \$16,160,000 (2022: \$15,352,000). The next distribution period is December 2023 to February 2024, payable on 8 April 2024.

Notes to the Financial Statements

For the year ended 31 December 2023 (Expressed in thousands of Trinidad and Tobago dollars) (Continued)

8. Unitholders' Capital

This represents the capital value of units issued by the Fund. The redeemable units of the Fund are 20.2 million.

9. Related Party Transactions

Parties are considered related if the following conditions applies:

- if one entity has the ability to control the other entity or exercise significant influence over the other entity in making financial or operational decisions, and
- if the entity and the reporting entity are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others).

The Fund is managed by the Corporation. Under the terms of the investment management agreement dated September 23, 2015, the Corporation may charge an annual fee of up to 0.5% of the net asset value of the Fund.

Total management fees for the year amounted to \$3.0 million or 0.5% of month end fund size (December 2022: \$3.1 million or 0.5% of month end fund size). The outstanding management charge due to the Corporation at 31 December 2023 amounted to \$0.3 million (2022: \$0.3 million).

The Corporation and the Growth and Income Fund (a related party sponsored and managed by the Corporation) invested in the Calypso Macro Index Fund as at 31 December 2023. The value of the holdings were \$30.8 million and \$140.4 million respectively. (December 2022: \$27.7 million and \$126.4 million respectively).

During the year, the Fund distributed to the Corporation and the Growth and Income Fund \$1.0 million and \$4.8 million respectively. (December 2022: \$1.0 million and \$4.5 million respectively).

There were no other related party transactions for the year.

10. Segment Information

The Fund has an equity portflio which is its reportable segment. The portfolio's investment objective and strategy is to invest in a diversified portfolio of equity securities issued by TTSE and NYSE and Foreign/Local unlisted companies to achieve capital appreciation.

The Board of Directors reviews the internal management reports of the sub-portfolio at least quarterly.

Segment information is measured on the same basis as that used in the preparation of the Fund's financial statements.

The Fund regards the holders of redeemable units as customers because it relies on their funding for continuing operations and meeting its objectives.

Notes to the Financial Statements

For the year ended 31 December 2023 (Expressed in thousands of Trinidad and Tobago dollars) (Continued)

11. Fair value of Financial Instruments

a) The Fair Value Hierarchy for Investment Securities

The Fund uses a valuation hierarchy to rank the fair value of its Investment Securities (see Note 2 (f)), as analysed below.

Fair Value Hierarchy for Investment Securities as at 31 December 2023				
Recurring fair value measurements Investment securities carried at fair value through profit or loss	Level 1	Level 2	Level 3	Total
Quoted equities Exchange traded funds (ETFs)	315,499 262,034	_		315,499 262,034
Total investment securities	577,533		_	577,533

Fair Value Hierarchy for Investment Securities as at 31 December 2022				
Recurring fair value measurements Investment securities carried at fair value through profit or loss	Level 1	Level 2	Level 3	Total
Quoted equities Exchange traded funds (ETFs)	346,941 272,273			346,941 272,273
Total investment securities	619,214	_		619,214

b) Transfers between Fair Value Hierarchy Levels

There were no transfers between the fair value hierarchy levels during either 2023 or 2022.

Notes to the Financial Statements

For the year ended 31 December 2023 (Expressed in thousands of Trinidad and Tobago dollars) (Continued)

12. Risk Management

Risk Management Framework

The Fund's investment activities expose it to a variety of financial risks. The Board of Directors has established policies, procedures, an Audit Committee and a Strategic Risk and Compliance Committee (SRCC) to identify, assess and manage these risks to safeguard the interests of all stakeholders and to achieve strategic objectives.

The SRCC meets at least once per quarter and is responsible for overseeing the Fund's risk management and compliance frameworks, programs and supporting policies.

The Audit Committee is responsible for discharging independent oversight of the Fund's financial reports and the Fund's compliance with statutory and regulatory requirements. The Audit Committee is also responsible for ensuring that Management has:

- i maintained the reliability and integrity of the accounting policies and financial reporting and disclosure practices.
- ii established and maintained processes to assure that an adequate system of internal control is functioning within the Fund.

Risk Exposures

The primary risks to which the Fund is exposed are:

- i. market risk which comprises:
 - equity and exchange traded funds (ETF) price risk
 - currency risk
- ii. credit risk
- iii. liquidity risk; and
- iv. operational risk

In alignment with the Risk Management Framework, these risk exposures are managed on an ongoing basis. Risks are monitored to determine compliance with approved risk tolerances and to ensure appropriate corrective actions are implemented when necessary.

Notes to the Financial Statements

For the year ended 31 December 2023 (Expressed in thousands of Trinidad and Tobago dollars) (Continued)

12. Risk Management (continued)

Market Risk

Market risk is the risk that changes in market prices for example equity, ETF price risk and foreign exchange rates will affect the Fund's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising returns.

Equity and ETF Price Risk

Equity and ETF price risk is the risk that the fair value of equities/ETFs decreases as a result of changes in the market prices for these securities.

The Fund has significant holdings of equities and ETFs all of which are traded on either the local or North American stock exchanges. Negative equity price movements in the local and foreign equity markets can subject the portfolios to decreases in their net asset values. This risk is managed by:

- i. careful asset allocation and security selection;
- ii. daily monitoring of security prices; and
- iii. monitoring and measurement of each portfolio's price risk exposure.

Equity price risk exposure is monitored and measured with reference to the beta of equity instruments. Beta is a measure of the stock's price sensitivity to the stock market e.g. stocks that have a beta of 1 would change by approximately 1% for every 1% move in the overall stock market.

A stock with a beta less than 0.9 is considered to have a low equity price risk relative to the overall market. A stock with a beta above 1.1 is considered to have a high equity price risk vis-àvis the market. A stock with a beta between 0.9 and 1.1 is regarded as having equity price risk comparable to the market.

The Fund's equity and ETF holdings are categorised below, both in dollar terms and as a percentage of total equity holdings into three (3) categories to reflect the Fund's exposure to movements in equity prices.

Notes to the Financial Statements

For the year ended 31 December 2023 (Expressed in thousands of Trinidad and Tobago dollars) (Continued)

12. Risk Management (continued)

Equity and ETF Price Risk (continued)

	Lower than market	Comparable to market	Higher than market
At 31 December 2023	167,544	346,737	63,252
	29%	60%	11%
At 31 December 2022	463,867	78,343	77,004
	75%	13%	12%

The following Table presents the approximate sensitivity of the net asset value of the Fund to a 5% change in the TTSE Composite Index and the S&P 500 Index respectively as at 31 December with all other variables held constant.

Market indicies	Change in equity price	Effect on net asset value	
	%	2023	2022
		+/-	+/-
TTSE composite index	+/- 5	\$12.8 million	\$12.7 million
S&P 500 index	+/- 5	\$13.8 million	\$10.8 million

Currency Risk

Currency risk is the risk that the fair value or the future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Since the Fund contains investments denominated in US\$, the Fund can be impacted by movements in the US\$/TT\$ exchange rate.

Notes to the Financial Statements

For the year ended 31 December 2023 (Expressed in thousands of Trinidad and Tobago dollars) (Continued)

12. Risk Management (continued)

Currency Risk (continued)

The foreign currency assets and liabilities of the Fund at 31 December are summarised below.

	At 31 December 2023		At 31 D	ecember 2022
	US\$	Other Foreign Currencies	US\$	Other Foreign Currencies
	(Pres	ented in TT\$)	(Pre	sented in TT\$)
Assets				
Cash at bank	11,571	_	12,486	_
Quoted equities	21,292	_	29,131	_
ETFs	262,034	_	272,273	_
Liabilities				
Payables	(2,557)		(332)	
Total	292,340		313,558	***

The following analysis shows how the effect of a 1% change in the TT dollar relative to the US dollar and other foreign currencies would have changed the net assets of the Fund at 31 December 2023 with all other variables held constant.

	At 31 De	At 31 December 2023		December 2022
	US\$	Other Foreign Currencies	US\$	Other Foreign Currencies
Approximate change	2,923		3,136	

Concentration of foreign currency exposure

At the reporting date, the financial assets in foreign currencies expressed as a percentage of the Fund's net assets were as follows:

% of total equity	2023	2022
US dollars	46%	49%
Other foreign currencies	_	_

For the year ended 31 December 2023 (Expressed in thousands of Trinidad and Tobago dollars) (Continued)

12. Risk Management (continued)

Credit Risk

Credit risk is the risk that the counterparty to a financial instrument will default on its financial obligations, that is, it fails to make full and timely payments of scheduled interest and/or principal sums due.

The Fund is exposed to credit risk primarily on short-term investments and bank balances. The carrying value of these assets represents the Fund's maximum exposure to credit risk on financial instruments on the respective reporting dates. Hence no separate maximum exposure to credit risk disclosure is provided for these instruments.

Credit risk is managed by:

- i. subjecting counterparties to robust credit risk assessments prior to initial acquisition;
- ii. limiting the acquisition or retention of debt instruments to certain credit ratings;
- regular review, measurement and monitoring of counterparties' credit ratings; and placing limits on the amount of risk accepted in relation to a single counterparty or group
- iv. of related counterparties and to geographical segments.

The credit quality of the Fund's short-term investments and bank balances are considered to have a high credit rating equivalent to international credit quality grades used by Standard and Poor's.

The security ratings by S&P and their corresponding impact on the credit quality on the investment securities are:

- ratings with AAA to BBB- are considered high credit quality instruments
- ratings with BB+ to B- are considered medium credit quality instruments
- ratings with CCC+ and below are considered low credit quality instruments

Liquidity Risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset as they become due.

The financial liabilities of the Fund are summarised by their due dates and shown below. The amounts disclosed are the contractual undiscounted cash flows. The Fund had no financial liabilities over one (1) year.

Other payables	332
Total	332

Operational Risk

Operational risk is the risk of direct or indirect loss resulting from inadequate or failed internal processes, people and systems or from external events. This is inherent within all business activities and has the potential for financial or reputational loss, this includes errors, omissions, disasters and fraud. It is managed through a combination of systems, processes and controls.

The Fund maintains a comprehensive business continuity program that enables it to be agile in responding to the various business continuity threats/operational disruptions that may arise.

Managing information/cyber security risks remains a priority. The Fund maintains an Information Security Program to respond to the ever-evolving cyber threat landscape. The organization continues to monitor and enhance its security posture and implements relevant controls and mitigants to reduce the impacts of cyber incidents.
